

## With Self Starter and Electric Lights

**ONE-MAN TRACTOR**

# MOLINE

## UNIVERSAL TRACTOR

It Solves The Farm Help Problem

**Model D**

Because of its ideal design, construction and performance, this new Moline-Universal enables one man to farm more land and produce more food than ever before possible. It is the world's most dependable farm hand.

New features include self-starter; electric lights; electrical governor; perfected overhead-valve, four-cylinder engine that is free from vibration; complete enclosure of all moving parts; differential lock which increases traction.

Drop forgings, heat-treated parts, steel cut gears and unusually large bearings add extra years of endurance.

These new features, together with the well known Moline-Universal type—all the weight on two wheels, one-man control and ability to do all farm work including cultivating—make the Moline-Universal Model D the best tractor money can buy.

Conservatively rated at 9-18, the new Moline-Universal has ample power for heavy belt work, and can plow as much in a day with two plows as the ordinary three-plow tractor, because of its greater speed. Yet it is light enough for such work as cultivating, moving, etc., which do not require so much power.

We will be glad to tell you all about this wonderful tractor. The next time you are in town call on us.

**BRUNSWICK, MO**

### Farm Bureau Notes

By Sam Jordan

Some fields are looking pretty badly from some trouble, the nature of which we are not able to determine at this time.

We have thot all along that the damage is due to leaf hoppers, since no Hessian fly nor chinch bugs are able to be found and to our surprise no leaf-hoppers.

It will be recalled that last fall leaf hoppers were very numerous and the yellow leaves were seen on wheat, rye, volunteer oats, blue grass, and many other plants.

Potatoes suffered severely from this pest.

It lives in the adult form over winter and on most any warm day may be seen very active.

It has been the last to stop work in the fall and among the first to appear in the spring, and has become very numerous in the past two years.

If the wheat damage is due to this pest the trouble, without doubt, is over, as the pest itself seems to have disappeared.

In the end we must depend on Nature's help in many ways since it may be recalled that when chinch bugs become very numerous something happens and they disappear almost at once. Their trouble seems to be a disease. Only a few years ago Hessian fly ruined whole fields of wheat, but when they seemed most "prosperous" something happened and the Hessian fly disappeared like magic.

We hope that leaf-hopper is the cause of the wheat trouble, for in such an event we think the trouble at an end.

There seems to be, however, some indication of a wheat disease but at this time it is not determined. If it is a disease we do not know just where the end may be. A close watch must be kept, for in the event that the trouble goes on, other crops may be grown where wheat fails.

#### Eggs for Hatching.

Thorough bred Barred Rocks. Fine bred to lay strain \$1.00 setting. \$5.00 per hundred. Transportation extra.

Milton C. Davis,  
Phone 132. Keytesville, Mo.

#### SPRING FEVER

##### Following Cold, Grippe, Thins Watery or Poisoned Blood

(By Dr. VALENTINE MOTT.)

At this time of year most people suffer from what we term "spring fever" or a stagnant condition of the blood, because of the toxic poison stored up within the body during the long winter. We eat too much meat with little or no green vegetables.

Bloodless people, thin, anemic people those with pale cheeks and lips, who have a poor appetite and feel that tired worn or feverish condition in the spring time of the year, should try the refreshing tonic powers of a good alternative and blood purifier. Such a tonic as Dr. Pierce's Golden Medical Discovery. It is a standard remedy that can be obtained in tablet or liquid form. Made without alcohol from wild roots and herbs.

Occasionally one should "clean house" with castor oil or tiny pills made up of the Mays-apple, leaves of aloe and jalap, and sold by almost all druggists in this country as Doctor Pierce's Pleasant Pellets.

#### Another Wage Advance

Director General Hines has granted another advance in wages to four railway brotherhoods, the pay to date back to Jan. 1 and increasing wages from \$15 to \$53.30 for men paid by the month and \$1.31 to \$1.53 day wages, the total for the 400,000 being near seventy million dollars annually.

The government went in the hole three hundred fifty millions dollars the first year it undertook to operate the railroads and congress was asked to appropriate seven hundred fifty millions to meet the deficit to July 1 this year but in the general muddle created by the actions of the delegates to the Peace Conference, the appropriation was not made. Still the treasury department may be depended on to get the money to carry out its purposes. Government operation of public utilities so far has meant big differences between income and expense notwithstanding increase in rates and deficiency appropriations are in order every session of congress.

Grade License No. 656

### Sir Dale 8609

A fine black Percheron, foaled 1917. A splendid individual and with get to indicate his quality. Season to insure \$10.

### Cooley

### The Bee Meeting

The meeting of Bee-Keepers at Brunswick was well attended and surely worth the while to any who keep bees.

Bees have been dying rapidly for a few years until some who had many colonies have lost them all. This disease is prevented if one only knows how. It is easily recognized, but in that also a person must know what to look for.

A diseased colony spreads the disease. So it seems that a person owning a diseased colony is a menace to others in the neighborhood. It is thus evident that if we get the disease out of the county every beekeeper must help and do his part.

The next meeting will be at 1:00 P. M. at Mendon, May 3rd. The first stop will be at the home of some beekeeper in town and we will try to visit every colony in town.

### Francois - 70676

### Latre 123904
